

Load centre substations – outdoor installation

Ring Main Station, 630 A

- Open-air enclosure with natural ventilation
- Set up as ring station with switch-disconnector system, GEAFOL transformer and low voltage niche

Technical data:

Switch-disconnector system 12 kV with two ring cable panels and a transformer feeder

GEAFOL transformer 11/0.42 kV, 630 kVA

Low voltage niche, equipped with incoming feeder circuit breaker based on transformer output, and outgoing 1 and 3 pole disconnectors from 6 to 500 A
